

## SAPONIFIED WAX

This saponified wax is an emulsion of beeswax and Marseille soap. It contains no synthetic or acrylic resin and is perfectly natural, with no unpleasant odour.

The wax available from the Compagnie des Ocrès is handcrafted in Avignon.

**Preparation:** This product is ready to use, unless you want a colour or an effect (pearlescent effect for example).

In this case, the colour is obtained by using pigment (maximum 20% by volume). Dilute the pigments by stirring thoroughly.

Before applying the coloured wax, a first layer of undyed wax or diluted acrylic paint should be applied to feed the untreated surface.

**Application:** Apply using a sponge, brush or spatula to achieve the desired effect. Before applying the coloured wax, a first layer of undyed wax or diluted acrylic paint should be applied to feed the untreated surface.

Drying: Approximately 2 hours to touch dry. Approximately 48 hours of total drying time (which allows for repeated treatments on surfaces avoiding any overlapping marks).

**Coverage:** 1 litre for approx 6 - 10 m<sup>2</sup>.

**Cleaning :** Wash tools with soap and water immediately after use.

**Qualities :** Wipes clean with a damp sponge and a mild detergent.

Can be used in wet or even very humid rooms with subsequent application of finishing wax.

***Refer to the proposed books for further information.***
